SUBJECT INDEX TO VOLUME 45

Acetazolamide, 231
Ala-Arg[8]-vasopressin, copper(II) complexes of oxytocin and, 193
Albumin, human serum, 93
Alkyl hydroperoxide-supported N-demethylation of N-methylaniline, 47
α-methyl-(2-thiophenomethylene) aryloxyacetic acid hydazides, 269
Amino acids
  metal Schiff base complexes and, 115
  N-salicylidene-1-amino acids, 115
  transition metal ions and, 159
Anion
  cobalt(II)bovine carbonic anhydrase and, 65
  L-ascorbic acid and, 73
  zinc and, 53
Anthraquinone anti-cancer drugs, 203
Antineoplastic agents, 203
Antitumor activity
  chloroethylamine platinum complexes and, 211
  cisplatin and, 211
Apatites
  carbonate and synthetic, 277
  ferric iron and hydroxy-, 129
  pH of preparation in synthetic, 277
Arthritis, chrysotherapy and rheumatoid, 261
Aspartic acid
  copper(II) and zinc with, 159
  oxovanadium(IV) and, 21
Azurins, iso-alcohols and, 39
Barbiturates, 221
Be(II). *See* Beryllium
Beryllium, inositol hexaphosphate and, 105
Binuclear 2,2′-Bipyridine-platinum(II), 135
Cadmium, 53
Calcium(II) complexes, 13
Calorimetric studies, 105
Cancer
  anthraquinone anti-cancer drugs, 203
  treatment for, 123
Carbonate, synthetic apatites and, 277
Cationic iron(III) complexes, N-salicylidene-1-amino acids and, 115
Chloroethylamine platinum complexes, synthesis, characterization, and antitumor activity of, 211
Chrysotherapy, 261
cis-bis-(2-chloroethylamine)platinum(II) and platinum(IV) complexes, 211
Cis-diamminedichloroplatinum(II)
  antitumor activity of, 211
  diamminediethyldithiocarbamatoplatinum(II) nitrate and, 123
cis hydroxyl couples, 169
Cisplatin. *See* cis-diamminedichloroplatinum(II)
Cobalt, barbituric acid and, 221
Cobalt(II)bovine carbonic anhydrase, anion and, 65
Copper(II)
  ala-arg[8]-vasopressin and oxytocin, 193
  α-methyl-(2-thiophenomethylene) aryloxyacetic acid hydrazides and, 269
  cytoprotective effect of, 245
  hydrogen peroxide and, 159
  1-hydroxy-4-(Glycyl-Histidyl-Lysine)-anthraquinone and, 203
Cytidine, 53
Cytochrome P-450, 47
Diamminediethyldithiocarbamatoplatinum(II) nitrate, 123
DL-alanyl-DL-alanine, europium and, 151
DNA binding studies, 123, 135
Electron paramagnetic resonance studies, 21, 31, 169
Electron spin resonance studies, 39
Electronic absorption spectroscopy studies, 31, 65, 169, 203
Ergothionine, 261
Ethanol, gastric mucosa damage with, 245
Europium, bioinorganic complexes of, 151
Ferrous nitrosylated hemoglobin, 31
Fluorescence, Quin-2 and, 85
Fluorescence emissions, azurin and, 39
Fourier Transform infrared spectroscopy studies, 73, 277
Gastric mucosa, copper(II) complexes and, 245
Glycine, copper(II) and zinc with, 159
Glycylglycine, 53
Gold(I) thiomalate, 261
Haemin-mediated H_2O_2, 47
Hemoglobin, ferrous nitrosylated, 31
Hemoproteins, 47
Horse, nitrous oxide derivative of ferrous, 31
Hydrogen peroxide, copper(II) and, 159
Hydroxyapatite, ferric iron and, 129
Hydroxylation, 47
Inositol hexaphophate, metal ions and, 105
Inositol phophates, complexation studies on, 13
Iron, apatites, synthetic carbonate, and ferric, 129
Iron, cationic iron(III) complexes, 115
Iron octa-alkylporphyrins, 179
Iso-alcohols, azurin interaction with, 39
Isoorotic acid, 1
K_2[Cu(N-methylphenobarbiturato)]4·$8H_2O$, anticonvulsant properties of, 221
L-ascorbic acid, alkali metal ions and, 73
L-aspartyl-L-alanyl-L-histidine-N-methylamide, nickel(II)-transfer of, 93
L-histidine, 93
Lead, inositol hexaphosphate and, 105
Leukemia
  chloroethylamine platinum complexes and, 211

diamminediethyldithiocarbamato-platinum(II) nitrate, 123
meso-α,α′-diaminoadipic and *meso*-α,α′-diaminosuberic acids, 135
Magnetic circular dichroism spectroscopy, 179
Meso-α,α′-diaminoadipic acid, 135
Meso-α,α′-diaminosuberic acid, 135
Mesoheme IX, 179
Metal complexation, sugars and, 169
Metal complexes, α-methyl-(2-thiophenomethylene) aryloxyacetic acid hydrazides and, 269
Metal ions
alkali, 73
amino acids and transition, 159
inositol hexaphosphate and, 105
Quin-2 and, 85
Metal Schiff base complexes, amino acids and, 115
Mossbauer effect studies, 129, 151
Multinuclear NMR studies, 53
myo-inositol 1,4,5-trisphosphate, 13
N-acetyl-DL-alanine, europium and, 151
N-acetyl-DL-valine, europium and, 151
N-salicylideneamino acids, metal complexes of, 115
Nickel(II)-substituted carbonic anhydrase II, 231
Nickel(II)-transfer process, 93
Nitrous oxide derivative, 31
NOE experiments, 231
Nucleic acids, orotic acid and, 1
^{1}H NMR spectroscopic studies, 123, 135
1-hydroxy-4-(Glycyl-Histidyl-Lysine)-anthraquinone, copper(II) coordination to, 203
Optical absorption, azurin and, 39
Oxidative N-demethylation, 47
Oxovanadium(IV), metal complexation by sugars and, 169
Oxovanadium(IV)-D-aspartic acid alpha-benzylester complexes, 21
Oxygen activation, 47
Oxytocin, copper(II) complexes of ala-arg^{8}-vasopressin and, 193
p-Fluorobenezenesulfonamide, 231
p-Toluenesulfonamide, 231
Pb(II). *See* Lead
Peptides, vasopressin-like, 193
pH-metric studies, 203
pH preparation, apatites, synthetic, and, 277
pH profiles
alkyl hydroperoxide supported N-demethylation of N methylaniline, 47
haemin-mediated H_2O_2, 47
Phenobarbituric acid, metal complexes of, 221
Phytic acid. *See* Inositol hexaphosphate
Potassium copper mefobarbiturate complex, 221
Potentiometric studies, 53
Protoporphyrin IX-containing heme systems, 179
Pyrimidine bases, orotic acid and, 1
Quin-2, metal ions and, 85
Rat, gastric mucosa damage of, 245
Ruminant, nitrous oxide derivative of ferrous, 31
6-carboxyuracil, 1
Sugars, metal complexation by, 169
Sulfanilamide, 231
^{13}C NMR studies, 261
Thione, 261
Tripeptide, native sequence, 93
Vanadium, 21
Vasopressin-like peptides, 193
Vitamin C. *See* L-ascorbic acid
X-ray photoelectron spectroscopic studies, 123
Zinc
α-methyl-(2-thiophenomethylene) aryloxy-acetic acid hydazides and, 269
anion and, 53
barbituric acid and, 221
cobalt(II)bovine carbonic anhydrase and, 65
copper(II) and hydrogen peroxide interaction and, 159
